Distributor: DME  
Product Name: Lisi Press ingots  
Description: The unique pressable Lithium Disilicate Glass Ceramic: GC Initial Lifi Press is the first lithium disilicate ceramic ingot with High Density Microization (HDM), a technology unique to GC. It uses equally dispersed lithium disilicate micro-crystals to fill the entire glass matrix rather than using traditional larger size crystals that do not take full advantage of the matrix structure. Ensuring the product remains super stable, without distortion or drop in value, after multiple firings. The result is the ultimate combination of strength and aesthetics, making GC Initial Lifi Press perfectly suitable for all types of restoration through all levels of transparency, providing unsurpassed physical properties and the most natural, lifelike aesthetics – press for a beautiful smile.
