Digital X-Rays from Henry Schein!

Henry Schein carries a wide choice of Digital Radiography products from leading dental manufacturers and is totally committed to providing excellent customer service. A comprehensive in-house installation and training programme is offered to all practices purchasing a Henry Schein system, and Henry Schein's own engineers will integrate new equipment into your existing system wherever this is possible.

The sales consultants at Henry Schein are well qualified to advise you on the most appropriate equipment for your practice, taking into account both your present and future needs. A range of leasing and finance is also available.

Natural Protection for Teeth & Gums

Reach for Beverly Hills Formula Natural toothpaste and discover the benefits of Aloe Vera and Echinacea’s natural gum protection. The Beverly Hills Formula Natural toothpaste not only prevents gum disease by controlling the amount of plaque that builds up on teeth but also, by nourishing and strengthening gums, fighting plaque, re-mineralising and hardening tooth enamel for cavity protection. It also leaves your breath smelling fresher. Aloe Vera is proven to strengthen the body’s defensive system and contains various ingredients which can help to protect against periodontitis and other diseases that can start in the mouth. Echinacea on the other hand acts as an effective ingredient against bacteria and viruses. Green Tea extracts have adverse effects on the bacteria that cause dental caries and other infections. Q10 protects against periodontal decline, decreases decay as well as healing gums whilst naturally combating the causes of plaque, tartar, bad breath, cavities and gum problems.

Purity Laboratories have developed gentle Natural toothpaste with excellent whitening power and no artificial colouring or flavours, nor does it contain SLS (Sodium Lauryl Sulphate). Laboratory studies prove that the Natural formula is less abrasive than other leading brands of both whitening and regular toothpaste. Beverly Hills Formula Natural contains Xylitol – which substantially helps to fight plaque (as shown in clinical studies), a cause of gum disease, tooth decay and bad breath. A regular Xylitol consumption resulted in a "highly significant" reduction in cavities of 55% to 60% and a decrease in dental caries (ranging from 50% to 60%). The long-lasting natural mint flavour freshens your mouth each time you brush. The Beverly Hills Formula Natural whitening toothpaste holds the natural key to your smile and is gentle on teeth and gums.

The Florida Probe System

The Effective Breakthrough in Computerised Probing

A top talking point when dentists meet is the new Florida Probe System, supplied by Clark Dental. The Florida Probe Sys...
The strongest argument yet for self-etch bonding

The first ever all-in-one dental adhesive, iBOND® from Heraeus Kulzer, has been improved to provide simpler application, better marginal sealing and higher bond strength. iBOND® Self Etch etches, primes, bonds and desensitises in just one step with the application of one single layer.

According to David Miller, Managing Director, Heraeus Kulzer Limited: “The new adhesive is a further development of the first ever all-in-one bond, originally launched in 2003. The highest strength one-bottle one-step adhesive currently available, iBOND® Self Etch is also even easier to use and even more reliable than its predecessor”.

iBOND® Self Etch, has been highly rated by more than 15 international universities and 150 testers – dentists from many different countries.

Ninety-three percent of the testers indicated that the product was easy to use and saved a lot of time due to the reduction in application steps. The majority of testers were impressed with the new adhesive and would use it in their own practice. Ninety-five percent would recommend it to their colleagues.

ASPD
Where Specialist Expertise Meets Industry Experience

Whether you are looking to purchase a new practice or make significant changes to the way you do business, the ASPD can help. In order to maintain membership, ASPD members have to prove that they have the experience and skill to provide effective advice to deal with situations and problems unique to dentistry. ASPD membership truly is a mark of quality, with members dedicated to giving you the best possible standard of assistance in any area of your business.

Sometimes the service will require a multi-disciplinary approach and those dentists looking to make changes may need advice from several different specialists. ASPD members are happy to recommend one another, and can work together to approach your problem from every angle, giving you a complete and comprehensive solution.

Teaming With Excellence

The potential value that lies within a dental practice is a major driving force affecting every facturers. Its ability to be ahead of the times, in offering the perfect solution, with a quality that heightens the degree of performance and sets a new standard for innovative products ergonomically designed and customizable for individual needs. Notoriously busy practice principals have little or no time to consider refurbishment options, concentrating diligently on the job in hand, striving for excellence in the clinical arena and taking good care of patients, but with the assistance of a reputable partner company within the specialist field of dental practice equipment, much of the responsibility can be offset.

At Tavom, hygiene and safety comes paramount in it’s unique designs, but Tavom’s dental cabinets are not only perfectly crafted, they also infuse a distinguished beauty into the workplace, making them a real asset certainly to last. Enjoy the benefits of smooth data and equipment management, custom made for your practice with Tavom.

Digital Dental Satelec Novus
Fast, easy-to-use and competitively priced

Digital Dental’s new Satelec Novus digital panoramic unit is fast, easy-to-use, competitively priced and enhances workflow.

The result of over 50 years experience in developing state-of-the-art panoramic systems the Satelec Novus is the “next step forward”. It is designed to fulfill all the needs of Practices demanding a first class digital panoramic unit at an economical price. Its extremely sensitive CCD sensor, advanced electronics and software combine together to ensure correct exposure values for every patient. With a 9 second exposure to prevent motion blurring and minimise patient discomfort, its adult panoramic feature also incorporates advanced spinal compression which ensures correct display of the dental anatomy with no distorting spinal shadow. Its paediatric program automatically shortens the exposure time and reduces the width of the exposed image for a lower X-ray dose.

The safe way to cut bone without damaging soft tissue

The Mectron Piezosurgery II, from General Medical, is the safe way to cut bone and other mineralised tissues without any risk to adjacent soft tissues. It has built in programmes for bone surgery (bone Types D1 – D3 plus “Special”) together with one-touch power settings for Perio and Endo inserts, variable fluid control and an automated cleaning cycle.

Piezosurgery II has the widest range of insert tips for all types of bone cutting and harvesting. It can be used in oral surgery, implantology, surgical orthodontics, endodontics and periodontology. Its modulated ultrasonics ensure that no damage occurs to soft tissue increasing the safety level of intra-oral surgery in such procedures as sinus lifts and nerve transpositions as well as in less complex cases.
