Happy 10th Birthday CAPPmea
CAD/CAM Digital Dentistry in a milestone year

By CAPPmea

In the year of IDS, important for all dental industry, another significant dental meeting in digital dentistry will take place in Dubai at Jumeirah Beach Hotel on 08-09 May 2015. This will mark the 10th Anniversary of CAD & Digital Dentistry International Conferences in Dubai.

Almost 20 years after the first CAD/CAM system was presented on the market with big enthusiasm, passion and belief in digitalizing of dentistry, CAPPmea started its first CAD/CAM and Computerized Dentistry Intl Conference in Middle East ten years ago. Together with a group of believers such as Dr. Munir Silwadi, Dr. Aisha Sultan, Dr. Omar Areeb, CAPPmea started the unique event with the support of 3M ESPE, Sirona, KaVo, Elcom and the UAE Ministry of Health. Through the passion of these leaders and supporters, what has been achieved today is the result of ten years of continuing dental education focused on Digital Dentistry. Today more than 15,000 dentists and dental technicians have been educated in digital dentistry by CAPPmea over the past decade.

When I started the CAPPmea over a decade ago, I couldn’t have imagined that I will be writing this post to all of you. But here we are, greater and stronger than ever before. It is really 10 years since we organized our 1st CAD/CAM & Computerized Dentistry International Conference and invited our first contributors to join us, most of which are still with us.

Back in 2005, I had a vision for what I wanted CAPPmea to become – a company that was professionally close to the client, fun, recognizable and innovative. I can say that we have achieved this through the hard work of our colleagues, sponsors, partners and supporters. CAPPmea has been able to establish a first-class standard for continuing dental education programs in Dubai for the MEA region. Our very 1st CAD/CAM & Computerized Dentistry International Conference summed it up successfully. I am proud to say that we have established and achieved a balance during all those years and continue to do so with every organized event.

Those attending the upcoming 10th edition of the symbolic CAD/CAM & Digital Dentistry Intl Conference will have the pleasure to see for the first time the new dental high-technologies post IDS. The event is packed with 17 international Key Opinion Leaders, 10 breathtaking scientific presentations and 8 hands-on courses where attendees will be able to practice on topics such as Advanced Anterior Composites, Indirect Inlays, Onlays & Partial Crowns, Non-Prep Veneers, Emergence Profile, Tilhases, Abutment Selection, proper Temporization, Bone Tissue, Indirect Veneers, Biological Preparations for CAD/CAM and non CAD/CAM Restorations as well as Chairside Economical Restoration of Esthetic Ceramics and Implant crown/abutment design.

The scientific program has accreditation from three important bodies, HAAD, DHA and ADA C.E.R.P. Centre for Advanced Professional Practices (CAPP) is an ADA C.E.R.P. Recognized Provider. ADA C.E.R.P. is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA C.E.R.P. does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. During the two day agenda, the Jumeirah Beach Hotel podium will become the center-piece for 17 top dental educators including Prof. Daniel Winneker, ACTA University The Netherlands, Prof. Richard Simonsen (USA), Prof. Paul Tipton (UK), Dr. med. Dent. Jan-Frederick Guth (Germany), Dr. Morten Worsøe (Denmark), M.Dr. Petr Hajny (CZ), Dr. Munir Silwadi (Canada), Dr. Andrea Gandolfi (UK), Dr. James Russell (UK), Dr. Harold Huskens (Germany), Dr. Jochen Kania (Germany), Dr. Nawaf Aldousari (Kuwait), Dr. Biju Krishnan (UK), Dr. Do Mahn (Chile), Dr. Gary Severance and Angela Severance (USA).

The long journey to the 10th Anniversary came along with plenty of challenges of running behind the incredibly fast growing industry and technological developments. A decade ago one could not even imagine such kind of opportunities which are now available and changing the face of dentistry, whilst improving patient care. All from diagnostic, planning to finalizing prosthetics post IDS. The event is a pleasure to see for the first time the new dental high-technologies. The event is packed with 17 international Key Opinion Leaders, 10 breathtaking scientific presentations and 8 hands-on courses where attendees will be able to practice on topics such as Advanced Anterior Composites, Indirect Inlays, Onlays & Partial Crowns, Non-Prep Veneers, Emergence Profile, Tilhases, Abutment Selection, proper Temporization, Bone Tissue, Indirect Veneers, Biological Preparations for CAD/CAM and non CAD/CAM Restorations as well as Chairside Economical Restoration of Esthetic Ceramics and Implant crown/abutment design.
