German quality at a low price:
The T4 instrument family from Sirona

By Sirona

Salzburg, Austria: The new T4 product class instruments from Sirona give dentists and especially dental students high German quality that is particularly cost-efficient. Instruments are an indispensable aspect of dentistry. It is therefore extremely important that dentists can fully rely on them. This is why Sirona now offers the German quality T4 class at a rather low price, making these products particularly interesting for dental students: They can acquire all of the important instruments they need for their studies in a student kit.

“This kit contains reliable and durable products at a very competitive price for students or young people who want to set up their own businesses,” said Product Manager Eric Bernet. “The T4 products fulfill Sirona’s high quality requirements in terms of design as well as hygiene and ergonomics.”

In regards to the design and ergonomics of the T4 product free, Sirona has opted for proven quality. The instruments lie perfectly balanced in the dentist’s hand and are ergonomically shaped. The material is both non-slip and easy to clean. The instruments can be sterilized in an autoclave or cleaned and disinfected in a thermodisinfector. The T4 products include a straight and contra-angle handpiece, the T4 Racer turbine and an air motor. The kit is available either with a Midwest 4-hole or Borden 3-hole connection and can be used with all common treatment centers.

T4 Racer turbine: Exceptionally powerful

The T4 Basic turbines are fitted with ceramic ball bearings that are almost vibration-free and hard-wearing. With a pressure of 2.5 bar, they have an output of up to 17 W. The chrome-plated sleeves give the turbines a high-quality appearance. The sleeves of both instruments are made of stainless steel and are top class in terms of appearance and feel. With the handpiece, the so-called single heads for single use can be used for prophylaxis and polishing.

The T4 student kit contains all of the important instruments and an air motor at a great price.

By Dental Tribune Middle East & Africa

Dubai, UAE: Dubai gathered, for the fourth time, the world experts of Dental Facial Cosmetic on 09th - 10th November 2012, an international conference, open to all aspects and specialists working in the field of Aesthetic Dentistry and Implantology. With the excellent ambiance and cozy atmosphere the conference again provided warm exceptional networking opportunities while connecting the leaders in the field of Aesthetic Dentistry & Implantology – practitioners, researchers and industry players.

Emirates Dental Society, Saudi Dental Society and CAPP for the 4th time achieved a great record of attendance and continued the reputation as the industry’s leading international conference in the field of Aesthetic Dentistry and Implantology.

Jumeirah Beach Hotel hosted 886 participants – Dentists, Dental Technicians, Dental Industry and Dental professionals in the very elegant atmosphere. Bringing together industrial leaders and professional practitioners, the conference not only delivered extensive scientific knowledge from across the globe but gave way for an excellent opportunity to present the latest advancements and developments within the Dental Facial Cosmetics practice.

The 4th Dental Facial not only opened the doors to open discussion and learning for this knowledge hungry region but allows the participants to build their skills and use the opportunity for networking and sharing experiences in the application of technology throughout the learning cycle – from primary and secondary education through to professional development and lifelong learning.

Other Industry Players – Dubai Medical

“The introduction of the new Dental Technicians Parallel Session last year has seen a vast improvement in the interest to improve the skills of the technicians at our conferences”

“The Scientific Program attracted 736 dental delegates and 150 Representatives from the industry all in all from 27 different countries”

“In total 42 companies represented 9 countries at the exhibition”
